

PDQ Panel & Frame

- Available in MFC, HPL, SGL, Real Wood Veneer and Colour Coat
- Over 30 laminate colours and 11 veneer colours
- Optional lockable panels and hinged access

The pre-assembled metal frame system, with pre-fabricated holes and slots in a pre-determined position, reduces the installation time by 50% compared to a timber frame, cutting labour time and cost in half. With panel splits to suit WCs, urinals, and WHBs, the system is a perfect option for any commercial washroom. The galvanized metal frame system is suitable for clinical installations, concealing services, and plumbing in multiple applications.
