

Traditional Boxed Out Unit

Our original healthcare boxed out unit features large access panels and has aluminium corner extrusions providing extra protection. The unit can be quickly and simply fitted to the wall using brackets and secured with tie back rods. Panels are available hinged and lockable and allow wide access points to services behind.

Bushboard healthcare boxed out units are available factory fitted, making them quick and easy to install and totally compliant with HBN 00-10 Part C.

Specification Options

Material:

Box: Solid Grade Laminate (SGL)
Panels: Solid Grade Laminate (SGL)
or High Pressure Laminate (HPL)

Maximum Height:

3000mm

Depth:

Typically up to 300mm

Ceiling:

Suspended or Solid Options

Regulations:

HBN 00-10 Part C Compliant

Colours:

34 laminate options

1. Box unit

Factory assembled Solid Grade Laminate (SGL) box is impact resistant and 100% impervious to liquids. Variable depth to accommodate service requirements.

2. Corner extrusions

Flush fitted, smooth and easy to clean aluminium corner extrusions for protection of vulnerable edges and seamless joining of panels.

3. Wall fixing bracket

Wall fixing brackets secure box unit to wall quickly and easily.

4. Framing

Factory assembled galvanised steel frame with integral rail for cisterns and sanitaryware.

5. Panels

Two panel options for consideration – SGL and HPL. SGL is highly impact resistant, easy to clean, has no sharp edges and is 100% impervious to water. HPL with smooth post bond edges is highly durable, easy to clean and water resistant.

6. Panel lock

Anti-tamper lock secures directly through the frame for added security.

7. Hinges

90 degree opening top hinge for easy access to services.

8. Panel stay

Panel stay locks the panel in place while in operation.

9. Tie Backs

Threaded rods adjustable in two planes tie the unit to the wall.

10. Panel-dock system

Maintains constant panel alignment during installation and ongoing use.
