WASHROOMS FOR ALL ENVIRONMENTS

Harlequin Cubicle Range

The practical vibrant and versatile children's range

Excelsior's flexible children's cubicle range. Available in various design options to suit any budget for school and nursery environments.

Specifically designed with children in mind, the low level profiled curves to the doors and partitions enable adult supervision whilst full height pilasters provide a robust structure and safe access for adults.

Two material specifications can be provided within the Harlequin system, High Pressure Laminate (Harlequin Select) and Compact Laminate (Harlequin Mariner).

In Addition, the Harlequin Peardrop system profile provides a self supporting low level alternative to the standard Harlequin cubicle design. Available in HPL and SGL

board specifications the rigidity of the cubicle is determined by the Excelsior designed support frames. The ability of these legs to perform is reliant on the strength of the floor.

Hardware is available in Aluminium as standard with a selection of powder coated finishes including Red, Yellow & Blue at an additional cost.

Digital print door designs are also available at an additional cost.

Panel and door colours can be selected from our preferred laminate range of preferred laminate manufacturers.

Downloadable BIM Objects

Our BIM Families are a time saving development with fully functional parametric objects. This highly acclaimed 3D model-based process is specifically designed for Infrastructure and Building projects. It offers many benefits to owners that enable simplicity for project management.

- Visualisation of designs
- Simulation of multiple design ideas
- Productivity improvement
- Analysing and testing of application and performance

BIM enables collaborative working; management of information as 'one team' within a digital model holding all the information required to design and construct the project from conception to completion.
